SAAS INSTRUMENTS

HOW TO INTEGRATE ALL BUSINESS PROCESSES IN TO ONE SOLUTION TO MAKE BUSINESS SMOOTHER

► ABOUT THE COMPANY

We make emotion driven technology. We know the latest mechanics – technology is our heritage. But moreover, we understand the poetry of light. We have spent the last three decades helping our customers discover a whole new level of meaning in lighting. Whether looking for the right ready-made components, elegant design fixtures or completely tailor-made solutions.

► THE NEED

As company has grown Saas Instruments have faced needs that have been solved with Standard ERP. One of their main customers requested EDI connection for automation of order process. This was done in cooperation with HansaWorld partner X3msoft and have now been in use since 2016. Next step is developing EDI connection to new platform and upgrading it to a two-way connection.

Another big need for Saas Instruments is management of production processes and warehouse management. Latest project has been implementation of production module, which have been a big change to the right direction regarding reporting and time management. was automated financial reporting.

“We have used spreadsheets for a lot of reporting, which we have now more efficiently in Standard ERP ation with partner and HansaWorld Finland”

► THE SOLUTION

First touch with HansWorld product in 2000 with HansaFinancials. Have used HansaWorld’s product more and more as company has grown. Have today over 10 users and using Standard ERP for all business processes. Latest project have been implementing production module to make reporting and production actions more efficient.

“We have done cooperation directly with HansaWorld and with partners. Today’s aim is to have efficient cooperation with partner and HansaWorld Finland”
